### DETAILED ACTION

1. This office action is in response to the amendment filed on 09/07/04.

#### ***Allowable Subject Matter***

2. Claims 1-14 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Applicants have amended the claims in compliance with the office action dated 06/21/04. Upon further consideration and comparison with prior art of record, the amended claims 1-14 are allowed. Prior art of record, taken individually or collectively, fails to fairly teach method and apparatus for measuring a jitter of a signal under test, as claimed, including "a timing jitter estimator to which the signal under measurement is inputted for obtaining its timing jitter sequence; a first differentiator to which the timing jitter sequence is inputted for calculating a first difference sequence to output a period jitter sequence; a corrector part to which the period jitter sequence is inputted for multiplying the period jitter sequence by a number equal to a fundamental period of the signal under measurement divided by an approximated zero-crossing point interval to output a corrected period jitter sequence; and a jitter detecting part to which the corrected period jitter sequence is inputted for obtaining a jitter of the signal under measurement" in independent claim 1 (claims 2-7 depend therefrom) and similarly in independent claims 8, 9 (claims 10-14 depend therefrom). Thus, claims 1-14 are found to be novel and unobvious over prior art of record.
